

Alex Bruno Kenfack Anafack

(514) - 235 – 6873 | kenfack_bruno@outlook.fr | Montréal, QC | [LinkedIn](#) | [GitHub](#)

Backend / Machine Learning Developer

PROFESSIONAL SUMMARY

- 8 Years of professional experience as a **Backend** Developer and **functional analyst** combining technical expertise in software development, **Rest APIs** development with a deep understanding of business needs.
- Specialized in **machine learning** (AI) and **computer vision** with practical experience in developing and deploying AI models with Rest APIs
- Proven track record in **Data Engineering**, **ETL pipeline** and **web scraping**, including designing robust scalable, and high-performance architectures for extracting, transforming, and loading large datasets from diverse sources: Google Ads, Google Analytics, ElasticSearch, Bing Ads, API, Web site, Databases
- Experience with cloud services and infrastructure, including **Azure Cloud**, **Docker**, **Terraform**, and **Airflow**
- Strong communication skills (**Bilingual**: native French, professional English) good for multicultural environments

EDUCATION

Bachelor's degree in computer science
University of Dschang • Dschang - Jul 2018

Junior Data Analyst – ParcoursTech
NPower Canada • Montréal - March 2025

PROFESSIONAL CREDENTIALS

- [Microsoft Azure AI Fundamentals AI-900](#)
- [IBM Data Analyst](#)
- [Intel® Edge AI for IoT Developers Nanodegree](#)
- [ADVANCED AI ART GENERATION](#)
- [AI Programming with Python Nanodegree](#)
- [FUNDAMENTALS OF COMPUTER VISION & IMAGE PROCESSING IN PYTHON](#)
- [AI Art Generation \(Dall-E, MidJourney, Stable Diffusion\)](#)
- [OpenCV AI Competition 2021 Phase 1 Finalists](#)

Projects ([GitHub](#) - Access available upon request)

- | | |
|---|--|
| <ul style="list-style-type: none">• Prime: An AI-powered audit assistance application designed to detect fraud risks in the allocation of public contracts

Stack: ReactJS, Django, Django rest framework, Web Scraping, Python Scripting, Machine Learning, ETL, Twilio, SendGrid, OAuth2, PostgreSQL | <ul style="list-style-type: none">• Audittrack: A tracking tool for monitoring audit activities conducted by the Audit Chamber of the Supreme Court of Cameroon

Stack: ReactJS, Django, Django rest framework, Twilio, SendGrid, OAuth2, PostgreSQL, Azure Storage |
| <ul style="list-style-type: none">• Sandbox: A platform enabling SMEs to create intelligent chatbots for their websites by simply providing the site URL | <ul style="list-style-type: none">• Peniang: A multi-application platform connecting all stakeholders in the waste value chain within a digital circular economy |

Stack: ReactJS, Django, Django rest framework, OAuth2, PostgreSQL, RAG, LangChain, OpenAI API, Azure OpenAI, Vector Store (FAISS), AI Agent

- **ChatGPT and DALL-E Clone:** Implementations of AI models for text and image generation.

Stack: ReactJS, Django, Django rest framework, OAuth2, PostgreSQL, RAG, LangChain, OpenAI API, Azure OpenAI

Stack: ReactJS, Django, Django rest framework, Twilio, SendGrid, OAuth2, PostgreSQL, Azure Storage

- **Dona:** Full OpenAI (chatgpt & Dall-E) capabilities on a WhatsApp Chatbot

Stack: ReactJS, Django, Django rest framework, OAuth2, PostgreSQL, RAG, LangChain, OpenAI API, Azure OpenAI, Vector Store (FAISS), AI Agent, WhatsApp API, Facebook API

SKILLS

Programming Languages	Python, SQL, HTML, CSS, JavaScript, C++, C#
Frameworks, CMS & APIs	FastAPI, Django, .NET, Django Rest Framework, ReactJS, OpenCV, Pytorch, Scikit-learn, LangChain, OpenAI API, Twilio, Pandas, NumPy, OpenVINO, ClearML, Microsoft 365, Microsoft 365 Administrator, Beautiful Soup, Scrapy, Selenium, MechanicalSoup, Google Ads, Google Analytics, Elasticsearch, Bing ads, SDLC
Appication Server / Web Tests	Nginx, Gunicorn, PM2, Azure VM, Azure App Server, RabbitMQ Pytest, Pylint, Postman
Vision Controls	Git, GitHub, Bitbucket, Azure DevOps
SGBD	PostgreSQL, MySQL, MSSQL, Azure SQL, Azure SQL for PostgreSQL, Azure SQL for MySQL
CI/CD	GitHub Action, Docker, Azure App provider, Terraform, Airflow
IDEs	PyCharm, VSCode, Visual Studio, Jupyter NoteBook, Google Colab
Methodologies	Scrum, Kanban, Jira, Trello
Systems	Linux, MacOS, Windows

WORK EXPERIENCE

Python Developer
Equisoft

Jan 2025 – Present

- Developed a modular and extensible Python core package for life insurance business rules, enabling developers to easily add new features and functionalities. Modules include cache service, business events, REST API, GraphQL, database, SMTP, and SFTP.
- Optimized the application's message exchange system using RabbitMQ, implementing dynamic queue management (creation and binding), custom consumers with failover handling, and custom providers.
- Enhanced the logging system by introducing tracking IDs, reducing debugging time and improving error traceability.

- Contributed to the build and development pipeline using Azure DevOps, including version monitoring with Artifacts.
- Supported the core application in production, ensuring reliable monitoring, deployment, and troubleshooting.
- Developed and improved configuration scripts based on client requirements, with a focus on life insurance business rules.
- Assisted internal teams in migrating to the new project architecture powered by the Python package.
- Delivered high-quality Python code, following best practices and actively participating in peer code reviews.
- Authored and maintained technical documentation, ensuring the ongoing quality, maintainability, and evolution of the software.

Lead Python Backend Developer

Jan 2024 – Jan 2025

AI Technologies for Africa • Yaoundé, Cameroon

- Supervised development teams, drafted specifications (functional and technical) for various management systems (Fraud detector, audit system, waste management)
- Developed and deployed an **ETL pipeline** to collect attribution decisions and call for tenders from public websites and store in a database
- Developed and deployed an **AI-powered audit support tool for detecting fraud risks** in public procurement in Cameroon
- Validated functionality and usability through User Acceptance Testing (UAT)
- Designed and implemented robust APIs using **Django**, **Django REST Framework**, and **PostgreSQL** and deploy on Azure (Azure App Service)
- Wrote unit test scripts with **Pytest** to test each stage of the ETL pipeline
- Developed and deployed a chatbot creation tool (**RAG: Retrieval Augmented Generation**) from data sources (website FAQs, documents, etc.) using OpenAI and LangChain
- Developed and deployed **Backend APIs** for a waste management application
- Created a WhatsApp **chatbot** for text and image generation using **Langchain**, OpenAI APIs, and **Django Rest Framework**

Python Machine Learning Developer

Jan 2022 – Jan 2024

Nano Dev SARL • Yaoundé, Cameroon

- Developed a food detection model using **Pytorch**, and **OpenCV**, enabling the detection of food items from mobile camera images.
- Implemented a **3D image reconstruction** algorithm to estimate the volume and weight of detected food items, enhancing the app's functionality and user experience.
- Designed, implemented, and tested an **ETL** process for clients, enabling the collection of data (with different format: csv, Json, XML) from various sources such as Google Analytics, Google Ads, Bing Ads, Outbrain, Facebook Business, S3, and ElasticSearch, and loading it into the data warehouse for efficient data management and analysis.

- Annotate and prepare data for Machine Learning tasks.
- Build, design, test, and deploy machine learning applications for clients' projects.
- Wrote unit test scripts with Pytest
- Convert Scripts from R to Python

Programmer Analyst

Jan 2019 - Jan 2022

Pether Corporation • Abuja, Nigeria • Douala, Cameroon

- Developed Insurance, Hospital management and Claim systems using Angular and Django Backend
- Supervised development teams, drafted specifications (functional and technical) for various management systems (insurance, hospitals, finance, healthcare)
- Business Analysis and Client Relations: Gathered and analyzed client needs, facilitated clarification workshops, designed customized solutions to optimize information systems
- Development and Implementation: Designed, developed, integrated, tested, and deployed business solutions. Validated functionality and usability through User Acceptance Testing (UAT)
- Continuous Improvement and Support: Analyzed processes, provided strategic recommendations on information systems (policies, management, security), liaised between business, technical, and support teams, conducted tests

Awards and Honors

- **Winner, DeepLearning IndabaX Cameroon 2023 Ideathon:** Developed an AI model to detect potholes using Pytorch and YOLOv8.
- **Afri-Plastics Challenge Stand 3 Finalist, 2022:** Developed a waste management system for connecting all actors in the waste value chain in a digital circular economy (<https://peniang.com>).
- **OpenCV AI Competition 2021 Phase 1 Finalist:** Developed AI to detect plant diseases using a camera with Fast-RCNN, Pytorch, OpenCV, and OAK-D.
- **Fonds Proto 2021 Technology Innovation Award:** Developed AI to detect plant diseases using a camera, implementing Fast-RCNN with Pytorch, OpenCV, and OAK-D ([OpenCV AI Competition 2021 Phase 1 Finalists](#)).
- **Winner, DeepLearning IndabaX Cameroon 2021 Hackathon:** Ranked second on the final leaderboard by classifying plant disease status from passion fruit images. <https://zindi.africa/competitions/indabax-cameroon-2021-1/leaderboard>
